

Located in Frankfurt, ProCredit Holding brings together a group of banks for small businesses (the “Hausbank” concept) and for ordinary people wishing to save and to conduct their banking business on a fair and transparent basis. ProCredit operates in developing countries and transition economies, as well as in Germany.

ProCredit Holding, the group’s parent company, is seeking to hire for its Application Development Team in Frankfurt am Main a dedicated

Junior Software Developer (f/m)

Responsibilities and tasks:

- Developing applications for processing and reporting of financial and operational data in a .NET (C#) environment
- Developing reporting solutions based on the group’s existing data warehouse architecture
- Developing custom spreadsheet features

Your qualifications:

- University/FH degree in the area of IT, or proof of equivalent qualifications
- Practical experience in database development, ideally using MS SQL Server
- Practical experience in object-oriented programming, ideally C#
- Experience or strong interest in data warehouse and BI technologies (MS Analysis Services, Integration Services, Reporting Services)
- Ability to discuss requirements and solutions with non-IT colleagues
- Very good command of spoken and written English
- Ideally, good command of German

If you can identify with the goals and ethical principles of our company, are curious about other countries and cultures, and enjoy working independently and meticulously, we can offer you a multifaceted and interesting position in a friendly and open working environment.

Please send your application, including a detailed statement explaining your motivation for applying for a job with our company, by post to: ProCredit Holding AG & Co. KGaA, Rohmerplatz 33-37, 60486 Frankfurt, Germany or by e-mail to:

PCH.junior-developer@procredit-group.com
